

CareNet

Home Monitoring Service

Living alone can be an uneasy situation, especially for an elderly loved one with medical difficulties. CareNET Home Monitoring Service is a simple, cost-effective solution that allows a loved one the satisfaction of independent living. This service offers peace-of-mind that comes in knowing there's always someone available to assist them.

Advanced Telephone System

The CareNET Home Monitoring telephone system features a sophisticated 2-way voice technology. Its superior speaker clarity, range, and built-in battery back-up make it a secure, effective link to our Response Center.

Emergency Response Transmitter

The emergency response transmitter can be worn at all times, indoors or out. If a situation arises and help is needed, a simple touch of the button activates the phone's speaker system and contacts our Response Center.

Professional Dispatchers

Our professionally trained dispatchers are available 24 hours a day. When contacted, an automated computer system displays necessary subscriber information, such as address, contacts, and medical history. The phone's powerful speaker even allows conversations from across the room.

Contacts

If emergency medical help is needed, the appropriate authorities will be contacted immediately and help will be on the way. If the situation is not an emergency, a predetermined friend, neighbor, or family member can be called to assist.

Monitoring & Security Services

In addition to CareNET Home Monitoring Service, Mosaic Telecom offers many monitoring and security services for your home or business. For more information, please call **1.888.579.7565** or visit our Web site at **www.mosaictelecom.net**.
